

## **Field Environmental Advisor**

G.A.S. Unlimited Inc - Cameron, LA

Contract

Location: Cameron, LA

Duration: 9+ Months

### General Description:

- Responsible for developing & administering the project environmental program in a brown-field refinery/chemical environment.
- Works directly with ES&H Manager & construction Superintendents to execute & monitor environmental processes based on project schedule.
- Reports operationally directly to ES&H Manager.
- Functionally reports to OG&C Manager of ES&H.
- This position may initially commence in the Houston office for front-end environmental program development & later transition to site for project duration

### Skills Required:

- Knowledge of environmental sciences/engineering systems, principles, and methodologies.
- Knowledge of national environmental laws/regulations and regulatory/resource agencies permitting processes and responsibilities, industry standards for environmental compliance, and best management practices for minimizing potential environmental impacts during project execution
- Knowledge of construction planning, estimating, procedures, and execution.
- Experience in managing and/or providing technical oversight of environmental subcontractors or consultants.
- Experience in environmental monitoring & compliance inspection during construction.
- Knowledge of hazardous materials and waste management, erosion & sediment control methods, & restoration techniques.
- Skilled in oral & written communication.
- Knowledge & skill in using Microsoft Office products

#### Duties & Responsibilities:

- Acts as the Project Environmental Lead (PEL), responsible for coordinating appropriate consideration of environmental requirements with Subcontracts, & Construction personnel.
- Provides environmental technical support & assistance & coordinates environmental requirements & formulation of mitigation measures with construction supervision/management.
- Participates in meetings with customers, project team members, & contractors/subcontractors to advise them of environmental requirements that may affect project design, schedule, & cost.
- Responsible for executing & maintaining Environmental Compliance Plans, Construction Environmental Control Plans (CECP), project specific mitigation plans, environmental awareness training programs, & technical reports.
- Conducts environmental compliance inspections of project construction activities to monitor compliance with environmental requirements including contractual commitments, permits, & the project's CECP.

#### Education/Training/Certifications:

- University degree in a field of science, environmental engineering, or related discipline, or 5 years environmental field experience in large construction projects &/or brown field projects.
